Restriction/Election - 35 U.S.C. 121

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 are drawn to pharmaceutical formulations of DHEA, classified in class 514 , subclass 169+.
- II. Claims 5-10 are drawn to method for preparing formulations, classified in class 514 , subclass 169+.
- III. Claims 11-15 are drawn to method of administering DHEA, treatment of systemic lupus erythematosus, classified in class 514 , subclass 169+.
- IV. Claims 11-16 are drawn to prevention or reduction of loss of bone density, classified in class 514 , subclass 169+.
- V. Claims 11-17 are drawn to treatment of chronic fatigue syndrome or fibromyalgia, classified in class 514 , subclass 169+.
- VI. Claims 18-21 are drawn to, pharmaceutical formulation of DHEA, classified in class 514 , subclass 169+.
- VII. Claims 22-27 are drawn to method of preparation of formulation, classified in class 514 , subclass 169+.
- VIII. Claims 28-32 are drawn to method of administering DHEA for the treatment of systemic lupus, classified in class 514 , subclass 169+.
- XI. Claims 28-33 are drawn to prevention or reduction of loss of bone density, classified in class 514 , subclass 169+.
- X. Claims 28-34 are drawn to treatment of chronic fatigue syndrome or fibromyalgia, classified in class 514 , subclass 169+.
- XI. Claim 35 is drawn to a method of controlling the bioavailability of a DHEA formulation, classified in class 514, subclass 169+.

If applicants want to elect the invention other than those cited above, they may elect a species and Examiner will build a subgenus falling in the species for examination.

The inventions of groups I-XI are distinct, each from the other because of the following reasons: Claims are drawn to different formulation, method of making and method of use. Each of them require a separate database search. It would be burden on the Examiner to search all the

Art Unit: 1616

instantly claimed invention in this application. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art and of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney LeeAnn Gorthy on 10/18/00 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I). It is suggested that in order to advance prosecution, the non elected subject matter be canceled when responding to this office action.
